

National Alliance on Mental Illness

Frederick Chapter Education Lecture

The Good, The Bad and The Ugly of Clinical Trials within Experimental Therapeutics and Pathophysiology Branch (ETPB) at NIMH

Presented by Diane Dillard-Broadnax, MSW, LICSW and Kat Prescott, RN

In this education lecture, we will

- Identify the therapeutic and exploratory interventions for severe mood disorders within the ETPB.
- Recognize the “behind the scenes” perspectives of the multi-disciplinary roles and functions within the research team for the ETPB
- Discuss some pros and cons of participation in clinical trials for mental health disorders

Free and Open to Everyone!

Wednesday, March 18, 2020

7:00 - 8:30 pm

YMCA

1000 N. Market St. Frederick MD

[Diane Dillard-Broadnax](#), MSW, LICSW, has worked as a licensed clinical social worker in the Washington, D.C. area for more than 30 years in healthcare management, hospital and community-based services and mental health research. She is currently a lead clinician for a branch at the National Institute of Mental health providing screening and consultation services, recruiting patients for clinical trials focusing on novel treatments for refractory depression. She recently won an award for exemplary performance in recruiting and community outreach initiatives for the branch.

[Kat Prescott](#), Is a senior clinical research nurse at the National Institutes of Mental Health and has been a staff educator and Crisis Prevention Institute (CPI) instructor, specializing in the management and care of patients with mood disorders, anxiety disorders and schizophrenia.
