

National Alliance on Mental Illness

Frederick Chapter Education Lecture

The Adverse Childhood Experience Study: What We Know and Why We Should Care

Presented by
Anne Soule

The Mental Health Association of Frederick County

Topics covered will include

- An overview of a landmark population health study
- The neurobiological impacts of exposure to adversity
- Current research about resilience
- Practices for developing resilience in children, families and communities

Free and Open to Everyone!

Wednesday, October 11, 2017

7:00 - 8:30 pm

YMCA

1000 N. Market St. Frederick MD

Anne Soule joined the Mental Health Association in 2014 to oversee the agency's work serving children and families in Frederick and Carroll Counties through Court Appointed Special Advocates (CASA), Supervised Visitation, Parent Coaching, home visiting (Healthy Families America), and most recently, working with families affected by incarceration. She co-teaches a class at Mount Saint Mary's University co-teaching titled, "Children and Trauma." Anne has been working in human services since 2003 and has spent many years managing people, projects and programs. She has a Master's degree in Adult Learning from the University of South Florida and a Bachelor of Science degree in business administration with a minor in fine arts from the University of Tampa.
